# New Diabetes Technologies and Therapeutics for the Primary Care Physician

Tuesday, November 24, 2015

8:00 am - 1:00 pm

NewYork-Presbyterian/Queens  
Theresa and Eugene M. Lang Center  
for Research and Education-Auditorium  
56-45 Main Street, Flushing, NY

## Statement of Need

The American Diabetes Association® estimates that almost 30 million children and adults in the United States have diabetes. 86 million Americans have prediabetes and 1.7 million Americans are diagnosed with diabetes every year. Diabetes is the primary cause of death for 69,071 Americans each year.\* Severe hypoglycemia can have devastating effects on people with diabetes and even mild episodes can seriously impact quality of life. Physicians and health care practitioners require updates on current and new diabetes technologies in development or on the horizon, such as advances in the automation of pumps, including integrated pump-and-continuous glucose monitoring systems, in order to provide optimal patient care and accurate patient education on available management options.

\*American Diabetes Association® Fast Facts-Data and Statistics about Diabetes revised 3/2015

## Target Audience

Endocrinologists, internists, pediatricians, family medicine physicians, hospitalists, physician assistants, residents, interns, medical students, nurse practitioners, nurses, dietitians, social workers, and other health care professionals involved in caring for the diabetic patient.

## Educational Objectives

It is intended that this NYP/Queens CME activity will lead to improved patient care. At the conclusion of this symposium, the participant will be able to:

- ▶ Describe and assess the different types of insulin pumps.
- ▶ Discuss criteria for evaluating insulin pumps for their patients.
- ▶ Specify the role of, and potential patient benefits and issues surrounding continuous blood glucose monitoring in the management of diabetes.
- ▶ Compare and contrast available continuous monitoring systems.
- ▶ Discuss the current status of artificial pancreases in development.
- ▶ Recognize the obstacles to artificial pancreas development and discuss proposed solutions to overcoming these challenges.

### To Register

Ms. Pamela Williams, Director, Continuing Medical Education

tel: 718-670-1419 • fax: 718-661-7925

## Accreditation

NewYork-Presbyterian/Queens is accredited by the Medical Society of the State of New York to provide continuing medical education for physicians.

NewYork-Presbyterian/Queens designates this live activity for a maximum of **3.25 AMA PRA Category 1 Credit(s)**™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

NewYork-Presbyterian/Queens is an approved provider of continuing nursing education by the PA State Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

It has been assigned approval code **134-3-H-12-31** for **3.25 contact hours**.

## Disclosure Statement

NewYork-Presbyterian/Queens relies upon planners and faculty participants in its CME activities to provide educational information that is objective and free of bias. In this spirit, and in accordance with the guidelines of MSSNY and ACCME, all speakers and planners for CME activities must disclose any relevant financial relationships with commercial interests whose products, devices or services may be discussed in the content of a CME activity that might be perceived as a real or apparent conflict of interest. Any discussion of investigational or unlabeled uses of a product will be identified.
