New Frontiers in the Management of Benign and Malignant Esophageal Disease

Tuesday, November 15, 2016

8:00 am-12:00 pm

NewYork-Presbyterian/Queens
Theresa and Eugene M. Lang
Center for Research and Education
56-45 Main Street, Flushing, NY

Statement of Need

Benign and malignant esophageal disease consists of many disorders that are common in our patient population today. There have been many recent advances in the diagnosis and treatment of these diseases. This 12th Annual Thoracic Symposium will review current trends, new technologies, and advances in the diagnosis and treatment of these disorders for primary care physicians and all others involved in the care of thoracic patients. Major topics that will be addressed include gastro-esophageal reflux disease, Barrett's esophagus, esophageal cancer, and esophageal motility disorders. An evidence-based review of the role of medical and surgical therapy in the treatment of these disorders will be presented. This symposium will address the key and often controversial issues in the diagnosis and treatment of these disorders.

Target Audience

Primary Care Physicians, Gastroenterologists, Surgeons, Medical and Radiation Oncologists, Pathologists, Pulmonologists, Radiologists, Nurse Practitioners, Nurses, Physicians Assistants, and all others involved in the care of patients with benign and malignant esophageal disorders.

Accreditation

NewYork-Presbyterian/Queens is accredited by the Medical Society of the State of New York (MSSNY) to provide continuing medical education for physicians.

NewYork-Presbyterian/Queens designates this live activity for a maximum of **3.5 AMA PRA Category 1 Credit(s)**[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
