Statement of Need

In order to provide optimal patient care OB/GYN physicians, Maternal-Fetal Medicine practitioners and other maternal health providers need to be updated on current advances and controversies impacting the quality of care and therapeutic decision-making. This program will provide attendees with a unique opportunity to interact with Internationally recognized leaders in their respective specialties presenting evidence-based information on key clinically relevant topics such as: *Updates in Reproductive Endocrinology; Advanced Stage Ovarian Cancer: The Treatment Dilemma Persists; Controversies in Gestational Diabetes.*

Target Audience

Obstetricians, Gynecologists, Gynecology Oncologists, Reproductive Endocrinologists, Primary Care Physicians, Family Practice Physicians, Fellows, Residents, Interns, Medical Students.

Educational Objectives

It is intended that this NewYork-Presbyterian/Queens CME activity will lead to improved patient care. At the conclusion of this symposium, the participant will be able to:

- Outline the latest advances in reproductive endocrinology and discuss their clinical relevance and applicability.
- Specify the factors and considerations influencing the decision-making process as to which patients with advanced stage ovarian cancer should undergo upfront surgical cytoreduction and which should receive neoadjuvant chemotherapy.
- Identify laparoscopic assesment as a standard of care allowing Gynecologic Oncologists to better determine therapeutic options to be pursued.
- Discuss advances in the chemotherapeutic management of ovarian cancer including commonly prescribed drugs, the administration of bevacizumab in combination with paclitaxel in platinum resistant disease, and the recent use of olaparib in platinum resistant disease.
- Specify the new, current criteria for diagnosing gestational diabetes.
- Identify issues and considerations surrounding the use of oral antidiabetic agents during pregnancy and discuss appropriate follow-up after gestational diabetes.
